Builder Rebate Program

This energy conservation program is designed to encourage builders to install natural gas appliances in their new construction projects. Builders must provide reasonable verification and there must be an active gas account to qualify for the residential new construction energy conservation program. Acceptable verification of new appliance includes the following: appliance make, model and serial number, authorized field employee verification or purchase and installation receipts. Please note ONLY connected appliance are eligible. If you have any questions, call 888.CITY.GAS.

Email this form to: FCG-Rebates@nee.com
